4.4. Define the term Diarrhoea. (1)

4.5. Which 2 diseases have a vaccine to prevent contracting the disease? (2)

Question 5**[10]****5. Answer the questions below.**

5.1. What percentage of South Africans are HIV positive? (1)

5.2. Read the passage below and answer the questions that follow.

John is a 13-year-old primary school student who loves art and rugby. Last year, he found out he has HIV. His doctor told him that with daily medicine, he can stay healthy and can't pass the virus to anyone else.

At first, John only told his best friend, but soon a few classmates found out and started spreading rumours. Some kids said they could "catch it" if John shared a water bottle or used the same bathroom. John's teacher talked to the class about what HIV really is — and what it isn't. Some students listened and began to understand, but others still whispered and kept their distance.

Now, John is doing his best to stay strong. He focuses on his art and his health, but he sometimes feels sad that not everyone is ready to learn the truth. He hopes that one day, people will understand that kindness and knowledge can heal more than words ever could.

5.2.1. Can the other children contract HIV and AIDS from John if they play with him?

Show your understanding by stating one-way HIV and AIDS is transmitted. (1)

5.2.2. How do you think John felt when the other learners kept their distance? (1)

5.2.3. Give an example of what you would say to defend John in this situation? (1)

5.3. Look at the pictures below and write what drug is shown. (2)

5.4. Give an example of 2 legal drugs. (2)

5.5. State one early warning sign of substance abuse. (1)

5.6. Which drug causes skin sores and tooth decay? (1)
